• I found that what we were doing in our math sections not that helpful. We solved problems mainly through a computer which we can not have a computer with us during a test. It was helpful though that during online classes, the material changed and instead of using a computer to find our answers, we had to write them down. That was good practice on what the professor was teaching us and helped us learn what we were suppose to.

• Jason is one of the best TAs I have had so far. He is very kind and makes sure everyone understands the material before he moves on or gives a quiz!

• really good teacher, nice, helpful.
